1.

Remove this.

While post task From Which location's client wants to looking for hire freelancer for this project.

Make this post a task & micro task in one section like client can opt short way to post his task & also a long way to post a task. Keep all field same.

Once client post there task through post task section then this task will showcase under the specific client upcoming section , this page : https://www.drivedigitally.com/dev1room/browse-task & browse task under all freelancer after login dashboard.

The post task page design will be like this : clean.

2.

Remove offer from here. on-going & upcoming,

Remove this section from ongoing , upcoming , hired .

https://preview.themeforest.net/item/workreap-freelance-marketplace-wordpress-theme/full_screen_preview/23712454?_ga=2.192756650.1698899285.1608602234-452769325.1581971732

https://themeforest.net/item/freelanceengine-freelance-marketplace-template/8630907

this design need to implement on ongoing , upcoming section
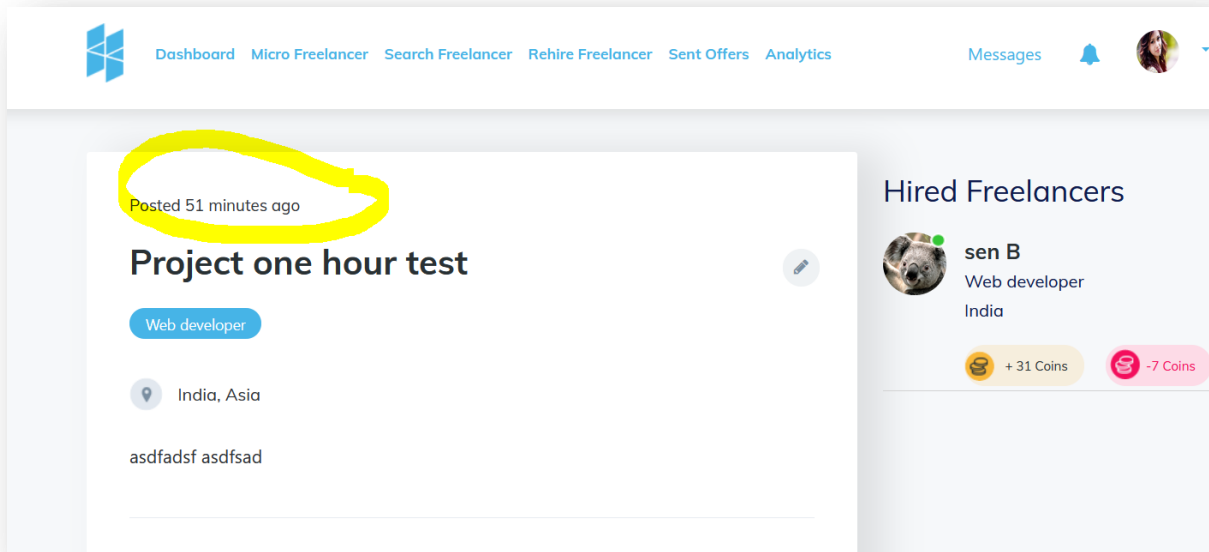

Project post date should be dynamic ,

3.

Total proposal should be dynamic . like how many proposal this project get should reflect here for the same .

4.
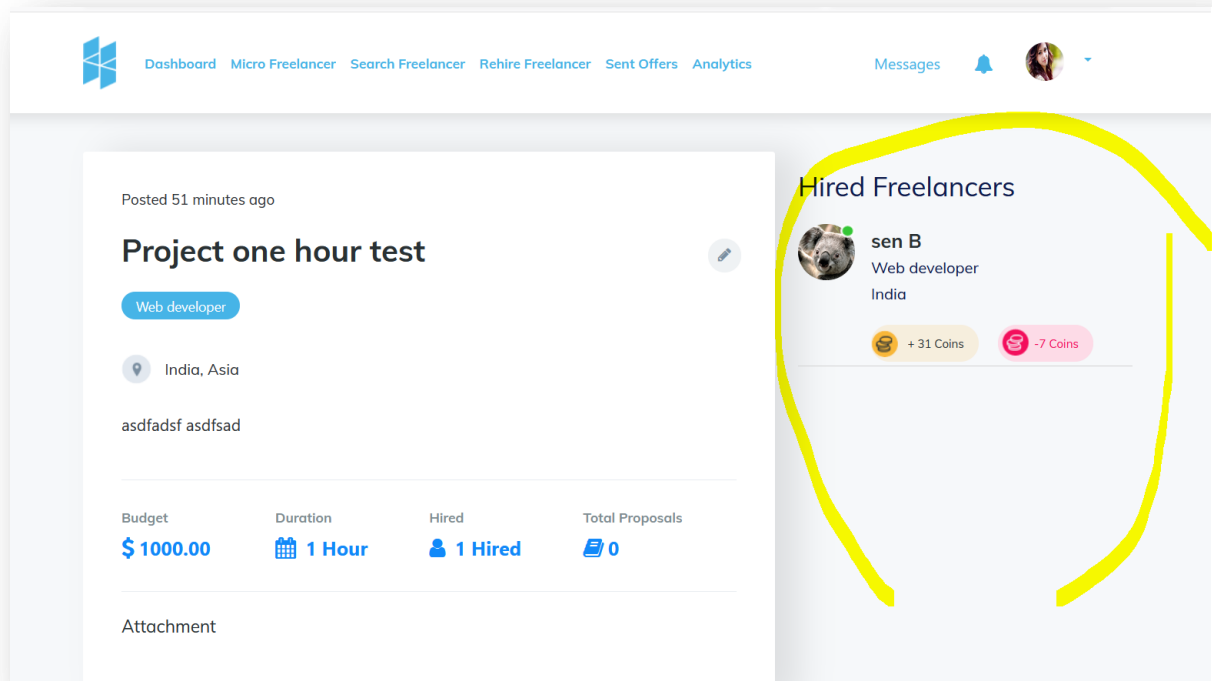

This right site is for , when old client open this tab then only can see his hired freelacer , when new client open this tab then only can see top most coin & earing getting freelancer .

Also I need to change this page design .

5.

After send a proposal from freelancer dashboad should hit or show a thank u message to freelancer that ur proposal has been send .

Once client hired for the specific freelancer for his work then then ,

This place hold number wil be 000, also for this hire page need to some text change.

Once client hired then project completed & mark review section should be done errorless, once client completed the project then freelancer get notification again complete the project , once both project completed then both party can view only review section .

If client mark the project incomplete then client can get a pop up to raise problem ticket .

Need to make fine for this 2 pages .

6.

Freelancer can create micro skill profile as per there skill.(partly done , need to fix : part) which will show under browse freelancer , micro freelancer. Under browse freelancer key profile also show) one freelancer can create 5 micro, once they create admin can get notification for the same & admin can check the micro details for the same.

https://www.drivedigitally.com/dev1room/browse-freelancer

Client can hire micro key for freelancer for specific micro task by helping hiring function. client notify for the same , After task done freelancer can deliver the task, Client approve the task give review , same for freelancer , Task completed (partly done , need to fix : part)

Client can browse freelancer (with skill) for his micro key task under browse micro freelancer tab under freelancer dashboard & send invitation or can direct hire , direct message to the specific , freelancer can reject invitation, hire, then client cant send the same for this specific freelancer for this specific job. (partly done , need to fix : part)

Design like : https://themeforest.net/item/chakri-job-board-freelance-services-marketplace-psd-design/23086416

https://gambolthemes.net/workwise-new/profiles.html

7. Analytics design like https://themeforest.net/item/chakri-job-board-freelance-services-marketplace-psd-design/23086416

8. https://www.drivedigitally.com/dev1room/job-details/5GJIQWI7EY

Need this page dynamic.
